

Bootstrap - Bug #4977

diag_packet_capture.php not working

08/18/2015 01:22 AM - Chris Buechler

Status:	Closed	Start date:	08/18/2015
Priority:	Normal	Due date:	
Assignee:	Chris Buechler	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
1) the packet capture functionality isn't working. It doesn't seem to run tcpdump at all when run with no timeout (or may die instantly), and you end up with an empty pcap file.			
2) when clicking "view capture", you end up with: "A valid IP address or CIDR block must be specified. []" where it should show the capture.			

History

#1 - 08/20/2015 09:43 PM - Steve Beaver

- File pfSense_localdomain_-_Diagnostics__Packet_Capture.jpg added
- Status changed from Confirmed to Feedback
- Assignee set to Chris Buechler

Unable to reproduce. Entered an address, clicked "Start. Waited a minute and clicked "Stop". Capture attached.

#2 - 08/25/2015 11:19 PM - Chris Buechler

- Status changed from Feedback to Closed

this isn't an issue where the bootstrap branch is synced on top of 2.2.4, so this is something specific to 2.3 base builds. Will revisit that separately from this as it doesn't look to be related.
