All PHP Lint errors rectified.

All were merge problem dropping braces or replacing ':' with '{'

php -l now produces zero errors on .php and .inc files

#3 - 08/25/2015 10:24 PM - Chris Buechler

- Subject changed from 14 files fail PHP lint to 9 files fail PHP lint
- Status changed from Feedback to Confirmed

Still 9 more.

Unable to reproduce these 9 errors. Checked my local source, and pulled down the code on my fork to check with the same results. I see zero PHP errors :(

the most recent PHP in Ubuntu is buggy in some regard with lint, checks out fine on PHP 5.5.27.
