

Bootstrap - Bug #5058

error when creating cert with no SAN

09/01/2015 12:00 AM - Chris Buechler

Status:	Resolved	Start date:	08/31/2015
Priority:	Normal	Due date:	
Assignee:	Chris Buechler	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
If you create a certificate with no SAN (delete all the Alternate Name fields), you get:			
<pre>Warning: Invalid argument supplied for foreach() in /usr/local/www/system_certmanager.php on line 269 Call Stack: 0.0000 245712 1. {main}() /usr/local/www/system_certmanager.php:0</pre>			

History

- Status changed from *Confirmed* to *Feedback*
- Assignee changed from *Steve Beaver* to *Chris Buechler*

I believe this error results from a change outside of the bootstrap project. The code around line 270 was changed recently and is no longer safe. Could we determine when/why please?

#2 - 09/03/2015 11:17 AM - Jim Pingle

- Status changed from *Feedback* to *Resolved*

Adding a cert without a SAN works fine now, though using SANs has separate issues, will open a ticket for that momentarily.
