Description			
Hello,			
it would be nice, to have an global settings tab und Services / DHCP Server. On this tab i like to declare my own dhcp options (http://ipxe.org/howto/dhcpd) and for all those other options, like default lease time etc. It could be a text field like those of the bind package "Custom Options" "Global Settings".			
At this point i only can modify the services.inc file to define my options. We have 57 locations with pfsense in the future, so the services.inc is not an practical way for us.			
regards Markus Schulz
