

pfSense - Bug #5294

System users and groups not fully protected from deletion

10/10/2015 02:35 PM - Fernando Munoz

Status:	Resolved	Start date:	10/10/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	User Manager / Privileges	Estimated time:	0.00 hour
Target version:	2.2.5	Affected Architecture:	
Affected Version:	All		

Description

It's possible to shoot yourself on the foot and delete the admin user and all/admin groups.

1. Configure tamper data/ burpsuit

Delete admin user - Steps to reproduce

2. Create any user

3. Attempt to delete that user and modify the http request, put user id 0 and name admin

4. admin will be deleted

Delete all/admins groups

2. Create a group called all or admins

3. Attempt to delete the group created and modify the http request, put group id 0 if using all or 1 if using admins

4. group will be deleted

This checks should be applied on the server side before attempting to do the action and not just when showing the menu.

History

#1 - 10/11/2015 03:13 AM - Phillip Davis

<https://github.com/pfsense/pfsense/pull/1957> should check for this case of the user manually messing with the \$POST value of "id" and display an input error message rather than deleting a system user.

I guess something similar for the Groups tab will cover that case also.

#2 - 10/11/2015 03:38 AM - Phillip Davis

<https://github.com/pfsense/pfsense/pull/1958>

Similar fix for preventing deletion of a system group.

#3 - 10/11/2015 03:39 AM - Phillip Davis

If these fixes for RELENG_2_2 are accepted, then they need to also be done in master for 2.3

#4 - 10/12/2015 11:45 AM - Phillip Davis

System User Delete checks committed <https://github.com/pfsense/pfsense/commit/8d070c072ec2b662f6a235cc3779fb62835dd647>

System Group Delete checks committed <https://github.com/pfsense/pfsense/commit/d7e5efa46134e738ae62e5c387c1e92fd803124d>

This should be fixed in a RELENG_2_2 snapshot built after the time of this post.

@Fernando - please test with these changes and confirm that these system users and groups are now protected from deletion.

#5 - 10/13/2015 09:15 PM - Chris Buechler

- *Subject changed from Deleting the undeletable to System users and groups not fully protected from deletion*
- *Category set to User Manager / Privileges*
- *Status changed from New to Feedback*
- *Target version set to 2.2.5*
- *Affected Version set to All*

#6 - 10/20/2015 07:54 PM - Chris Buechler

- *Status changed from Feedback to Resolved*
