

pfSense - Bug #5364

IPsec status pages show all time units as seconds

11/02/2015 11:24 AM - Chris Buechler

Status:	Resolved	Start date:	11/02/2015
Priority:	Very Low	Due date:	
Assignee:	Matthew Smith	% Done:	100%
Category:	IPsec	Estimated time:	0.00 hour
Target version:	2.3	Affected Version:	2.2.5
Plus Target Version:		Affected Architecture:	
Release Notes:	Default		

Description

The vici plugin outputs all status times in seconds, where SMP status output hours for times > 1 hour, minutes for times > 1 minute and < 1 hour, and seconds for times < 1 minute. It works fine, so we'll target 2.3 for this, just isn't user-friendly.

Associated revisions

Revision 00ae4060 - 11/11/2015 04:40 PM - Matthew Smith

Add "(hh:mm:ss)" in fields where time values are displayed in seconds on diag_ipsec.php. Fixes #5364

History

#1 - 11/10/2015 01:47 PM - Jim Thompson

- Priority changed from Normal to Very Low

I'm OK with 'seconds'.

#2 - 11/10/2015 01:53 PM - Jim Pingle

We do have a function for this: `convert_seconds_to_hms($sec)` [source:src/etc/inc/pfsense-utils.inc#L1171](#) - shouldn't be too hard to plumb in where needed since the values are already being printed by PHP, no?

#3 - 11/11/2015 12:36 PM - Jim Thompson

- Assignee set to Matthew Smith

as suggested in chat, "xxxxxx seconds (hh:mm:ss)" seems best.

- Status changed from Feedback to Resolved

Looks good, thanks! Not a big deal but most people don't recognize tens of thousands of seconds at a glance, and it's easy to make human-readable.
