Bootstrap - Bug #5380

setup wizard timezone should default to GMT

11/07/2015 12:47 AM - Chris Buechler

Status:	Resolved		Start date:	11/07/2015
Priority:	Low		Due date:	
Assignee:	Chris Buechler		% Done:	100%
Category:			Estimated time:	0.00 hour
Target version:	2.3		Spent time:	0.00 hour
Description				
The timezone in the setup wizard defaults to the first in the list. Should default to GMT as before.

The 2.2 code seems to do the opposite! It creates a selector using the timezonelist, but removes GMT from that list.

The default is the current config->timezone. The timezone is not included in the default config.xml hence it uses the first in the list.

```
    // timezone selector from REL2.2

    echo "<select class='formselect' name='{$name}'>\n";
    foreach ($timezonelist as $tz) {
        if (strstr($tz, "GMT")) {
            continue;
        }
        $SELECTED = "";
        if ($value == $tz) {
            $SELECTED = " selected=\"selected\"";
        }
        echo "<option value=\"" . htmlspecialchars($tz) . "\" {$SELECTED}>";
        echo htmlspecialchars($tz);
        echo "</option>\n";
    }
    echo "</select>\n";
```

Easy enough to adopt the behavior you suggest, but is that really "as before" ?

The default config.xml used to contain "<timezone>"Etc/UDT"</timezone> but that was recently removed when changing from a static TZ the FreeBSD TZ.

That value has now been added to wizard.php as a default if no timezone is set. IOW it now defaults to "Etc/UDT"
