**Description**

In both 2.2.5 and 2.3-ALPHA there is a front-end GUI checkbox for "TXT Support" that successfully adds a "txtsupport" tag into the config when checked.  
But there is no other code that uses it, so there is zero chance that it will do anything.  
It might be nice for someone to write some functional backend code for this some day :)

#### Associated revisions

##### Revision 4cec6193 - 12/03/2015 03:24 PM - Chris Buechler

Remove txtsupport from Unbound. Of limited use, and the back end code was never ported over from the package (and is messy to do so). Ticket #5545

##### Revision dc77f005 - 12/03/2015 03:26 PM - Chris Buechler

Remove txtsupport from Unbound. Of limited use, and the back end code was never ported over from the package (and is messy to do so). Ticket #5545

- Status changed from New to Resolved

I removed it for the reasons doktornotor noted.
