| Status: | Resolved | Start date: | 12/15/2015 |
| Priority: | Normal | Due date: | |
| Assignee: | Renato Botelho | % Done: | 100% |
| Category: | Captive Portal | Estimated time: | 0.00 hour |
| Target version: | 2.5.0 | Release Notes: | Default |
| Plus Target Version: | | | |
| Description | | | |
| As far as I afaik, the captive portal logins are stored on disk – however they still get cleaned out every time pfSense is rebooted (whether for upgrades or not), requiring ~1500 people to relogin... Happens with every 2.1.x or 2.2.x version as far as I can see. | | | |

History

#1 - 12/17/2015 10:32 PM - Chris Buechler

- Tracker changed from Bug to Feature
- Subject changed from Captive Portal forgets all logins on reboot to Captive Portal retain logins across reboot

That's by design, though it'd probably be OK to not rm the database on boot. Needs review for a variety of potential edge case problems that might introduce.

#2 - 01/06/2019 09:44 AM - A FL

Pull Request : <https://github.com/pfsense/pfsense/pull/4054>

#3 - 05/30/2019 04:19 PM - Renato Botelho

- Status changed from New to Feedback
- Assignee set to Renato Botelho
- Target version set to 2.5.0
- % Done changed from 0 to 100

PR has been merged. Thanks!

#4 - 06/01/2019 12:05 PM - A FL

I can confirm it's working well.
This issue can be marked as resolved
