#### Description

Edit an entry on interfaces\_ppps\_edit.php and the correct options are not displayed. Choosing another type from the drop-down doesn't change the available options either, and sometimes has no effect. The displayed options are always for the 'ppp' type, as opposed to the selected choice, such as PPPoE.

- Status changed from Feedback to Resolved

Looks much better now. The only thing that doesn't work is changing the type of an existing interface, but I'm not sure that's something we'd want to allow anyhow. I can't recall if that worked on 2.2.x, probably not.
