

pfSense - Feature #5829

Factory reset should uninstall packages too

01/29/2016 02:54 PM - Ivor Kreso

Target version:	2.3	Release Notes:	Default
Plus Target Version:			
Description			
Currently on 2.2.x whenever you do a factory reset packages will not be removed. Instead, they are just removed from the GUI options and menus. I suggest this is changed for 2.3, more useful for troubleshooting if the packages are also removed.			
Thanks.

- Status changed from New to Assigned

It makes sense. All additional packages config will be removed from config.xml when factory reset happens. So it doesn't make sense to keep binary packages around.

- Status changed from Feedback to Resolved

Tested on a full install and it worked fine. The warning appeared, and after the reset, packages were gone. Looks good to me.
