<b>Affected Version:</b>	All		
<b>Description</b>			
After restore a backup with vlans on lagg the GUI asks the user to resolve the conflict that doesn't exist.			

#### Associated revisions

##### Revision 2915acf8 - 02/19/2016 11:25 PM - Chris Buechler

Don't trigger an interface mismatch for lagg interfaces, they may not exist at time of config restore. Ticket #5892

#### History

##### #1 - 02/19/2016 11:20 PM - Chris Buechler

- Category set to Backup / Restore
- Status changed from New to Resolved
- Assignee changed from Luiz Souza to Chris Buechler
- Affected Version changed from 2.3 to All

is\_interface\_vlan\_mismatch checks if interfaces exist, in the case of lagg it might not at time of config restore. That should be the only type of VLAN parent interface which wrongly triggers an interface mismatch, every other possibility would be a physical interface where that check's legit.

Works now.
