Affected Version:	2.3	Affected Architecture:	All

Description

The "Certificate Type" selection when creating a new certificate offers a choice of "CA", but the choice is broken and doesn't have a good reason to exist. CAs should be created on the CA tab, not here. Otherwise users are able to make invalid CAs which lacks the correct properties to sign other certificates,

Associated revisions

Revision 1c2b01a7 - 02/24/2016 02:49 PM - Jim Pingle

Do not offer the "CA" type when creating a certificate. CAs should only be made on the CAs tab. Fixes #5924
