<b>Affected Version:</b>	All		

#### Description

If you create an OpenVPN client config specifying a username and password, then change it to shared key, the username and password are still added to the OpenVPN config. That prevents the client from starting with "Options error: --auth-user-pass requires --pull".

#### Associated revisions

Revision a6d55c23 - 03/01/2016 01:32 AM - Chris Buechler

Only specify auth-user-pass for TLS mode. Ticket #5941
