Description

As a continuation of https://redmine.pfsense.org/issues/4206 I have made some bug fixes.
They address the following issues:

status_dhcpv6_leases.php

- Fix indexing of $mappings: Remove "$entry['iaid'] . " from $mappings[] since the IAID of the IA_NA does not need to be equal to the IAID of the IA_PD, please see note in https://redmine.pfsense.org/issues/4206#note-9
  This makes sure that Routed To in Delegated Prefixes can be shown even when the IAID of the IA_NA != to the IAID of the IA_PD.

- Fix column headers: Add table header for the icon in the Delegated Prefixes section to fix alignment of the column headers.

- Fix lack of incrementation of index in parse_duid() when two characters have been combined and passed (meaning \\ and \") for use in the IAID and DUID strings.

- Fix check in parse_duid() of $n so that the octal value is checked as an octal value and not with is_numeric($n).

prefixes.php

- Fix substr mistake: I made a silly mistake in extract_duid() and overlooked an important difference between javascript substring() and php substr().

- Tightened regex check for octal value in extract_duid().

- Fix missing check for $active to avoid creating a route to a released lease.

I will link to the pull request in a moment.

History

#1 - 03/02/2016 05:22 PM - Anders Lind

Pull request for the mentioned issues are located here:
https://github.com/pfsense/pfsense/pull/2700

Many thanks for your time! :-)

#2 - 03/02/2016 05:39 PM - Jim Thompson

- Assignee set to Chris Buechler

#3 - 03/02/2016 05:39 PM - Jim Thompson

- Category set to DHCP (IPv6)

#4 - 03/03/2016 02:56 AM - Chris Buechler

- Status changed from New to Feedback

Merged, seems fine. Leaving to feedback for more widespread testing once it hits a snapshot.

Thanks Anders!

#5 - 03/03/2016 10:21 PM - Chris Buechler

- Status changed from Feedback to Resolved
