

pfSense - Bug #6005

CloudFlare dyndns API changes other record settings

03/16/2016 02:37 PM - Jeffrey Dvornek

Status:	Resolved	Start date:	03/16/2016
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Dynamic DNS	Estimated time:	0.00 hour
Target version:	2.3	Affected Architecture:	
Affected Version:	2.2.x		

Description

The update to the CloudFlare API implemented in [#4737](#) hardcodes the 'proxiable' and 'proxied' parameters to false.

The 'proxiable' parameter is a read only value and should not be set on update.

The 'proxied' parameter controls whether CloudFlare services are enabled for the host; setting to false ensures that every time a DNS update propagates, CloudFlare services are disabled.

I believe a sufficient fix would be to simply remove these parameters from the update request.

History

#1 - 03/18/2016 08:13 PM - Chris Buechler

- Category set to Dynamic DNS
- Status changed from New to Resolved
- Target version set to 2.3

this was fixed in December in e93a7c71db7b35512591028316f15f579cd57cf7

#2 - 03/31/2016 05:14 PM - Chris Buechler

- Affected Version set to 2.2.x
