

pfSense - Bug #6212

Update checks being done in the background even when disabled on dashboard

04/20/2016 04:16 AM - Phillip Davis

Status:	Resolved	Start date:	04/20/2016
Priority:	Normal	Due date:	
Assignee:	Phillip Davis	% Done:	100%
Category:	Upgrade	Estimated time:	0.00 hour
Target version:	2.3.1	Affected Architecture:	
Affected Version:	2.3		

Description

If "Disable the automatic dashboard auto-update check" is checked in update settings, the code is still doing the check in the background (even though the result is not displayed on the dashboard GUI). This causes problems for people who disabled it because the background processing of the package commands is a problem for whatever reason.

Fix #6212 Really disable checks

Belts and braces here - I the setTimeout is not done then the other bits of code do not get called anyway, but I took them all out to make sure there is no way to accidentally do the update check when it is disabled.

confirmed, checked prior to update when disabled, doesn't now. Thanks Phil!
