

pfSense - Bug #6277

RRD graphs are not created correctly for interfaces using CODELQ

04/27/2016 10:55 AM - Jim Pingle

Status:	New	Start date:	04/27/2016
Priority:	Normal	Due date:	
Assignee:	Luiz Souza	% Done:	0%
Category:	RRD Graphs	Estimated time:	0.00 hour
Target version:	2.5.0	Affected Architecture:	
Affected Version:	2.3		

Description

If a user sets an interface queue to CODELQ, errors appear in the logs from RRD:

Creating:

```
RRD create failed exited with 1, the error is: ERROR: you must define at least one Data Source
```

Update:

```
The command '/usr/bin/nice -n20 /usr/local/bin/rrdtool update /var/db/rrd/opt4-queues.rrd -t N' r returned exit code '1', the output was 'ERROR: Not enough arguments'
```

When CODELQ is set on an interface, it has no child queues, which may be the source of the problem.
