Target version:	2.3.1		
Description			
This is a request to bring back the hostname displayed in the menu bar as it was up to the 2.2.x releases.			
I'm administering about 20 pfSense boxen on a daily basis, and it was so useful to confirm I'm on the right box simply by looking at the menu bar.			
I'm quite sure this informative element can be integrated into the new GUI design easily.

- *Assignee set to Markus Strangl*
- *Target version set to 2.3.1*

The new UI design makes this difficult, so for now I have added the information as a tool tip to the pfSense logo. Hover over that and you will see the hostname.

We'll look at doing this a better way in the future.
