

pfSense - Bug #6448

Mousing over aliases on disabled rules makes hint difficult to read

06/04/2016 11:47 AM - Chris Linstruth

Status:	Resolved	Start date:	06/04/2016
Priority:	Low	Due date:	
Assignee:	Jared Dillard	% Done:	100%
Category:	Web Interface	Estimated time:	0.00 hour
Target version:	2.3.3		
Affected Version:	2.3.1	Affected Architecture:	

Description

Mousing over aliases and other elements in a firewall rule set pops up a hint showing the contents of the alias.

Doing so on a disabled rule causes the popover to use the same translucency as the disabled rule creating a hard-to-read result.

Should consider making popovers 100% opaque even on disabled rules. I don't know if an opaque popover is ever desired.

The opacity of the popover is inherited from the parent element. AFAIK there is no easy way to avoid inheritance of opacity. Propably the easiest solution would be to change the visibility of the text.

```
tr.disabled th,  
tr.disabled td {  
    opacity: 1;  
    color: rgba(0, 0, 0, 0.5);  
}
```

```
tr.disabled td .popover {  
    color: rgba(0, 0, 0, 1);  
}
```
