Description			
<p>Trying to run bhyve in pfsense 2.3.1. I have install vm-bhyve. But I found it is not working properly when executing "vm init". The the routine "vm-common" is issuing the command kldstat with the wrong parameter. It is using -n instead of -m.</p> <p>It wrong identified that the if_bridge kernel module was not loaded.</p> <p>Here is the patch</p> <pre>--- vm-common.orig 2015-11-11 15:30:13.000000000 0000 ++ vm-common 2016-06-06 19:44:31.838580000 +0000 @ -41,7 +41,7 @ # __load_module(){ local _mod="\$1" - kldstat -n \${_mod} >/dev/null 2>&1 + kldstat -m \${_mod} >/dev/null 2>&1 if [\$? -ne 0]; then kldload \${_mod} >/dev/null 2>&1 [\$? -ne 0] && __err "unable to load \${_mod}.ko!"</pre> <p>Thank you</p>			

History

#1 - 06/08/2016 03:28 AM - Jose Luis Duran

This was fixed in vm-bhyve v0.12.3.

(<https://github.com/churchers/vm-bhyve/commit/a74ef7e04a5fa5ce256fe2f213dec6f51b8f8847>)

Considering the current package version is vm-bhyve-1.1.5, this just can be closed, no?

#3 - 09/28/2017 03:30 AM - Kill Bill

As noted above, long fixed.

#4 - 09/28/2017 06:29 AM - Jim Thompson
