

pfSense - Bug #646

DHCP Daemon settings do not sync to peers

Target version:	2.0	Affected Architecture:	
Affected Version:	2.0		

Description

DHCP Settings do not sync to peers in a CARP cluster, mainly because of the failover IP must be preserved.

There may be a way around this limitation, or perhaps a way to assume the failover IP for the remote if configured on the master. It should be the IP on the corresponding interface on the master. (e.g. Master LAN is 192.168.1.2, Backup is 192.168.1.3, failover peer on Backup should be .2)

Associated revisions

Revision 9434370c - 06/11/2010 11:50 AM - Jim Pingle

Sync OpenVPN settings and DHCP Daemon settings via XMLRPC, and for DHCP set a proper failover IP where needed. Ticket #645 & Ticket #646 - Still needs a way to sync/restart services on Backup after config sync.

Revision c3fef0c9 - 06/11/2010 02:08 PM - Jim Pingle

Restart dhcpd and OpenVPN on backup box. Fixes #646 - Helps ticket #645 but that still needs work.
