

pfSense - Bug #6463

Firewall > NAT, Outbound Network destination field incorrectly displays port aliases

06/07/2016 11:12 AM - Chris Linstruth

Status:	Resolved	Start date:	06/07/2016
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Web Interface	Estimated time:	0.00 hour
Target version:	2.3.1_2	Affected Architecture:	
Affected Version:	2.3.x		

Description

Create an outbound NAT rule with a source and destination network and save.

Re-edit the rule.

Type in the destination network field. It autocompletes with the list of port aliases.

Change Destination Type from Network to Any and back to Network. Now autocompletes with network aliases.

Revision d4d8f293 - 06/07/2016 08:53 PM - Phillip Davis

Fix #6463 Dest net alias matching on page load

Do not set destination field to use customarray

Note: dstbeginport_cust does not exist on this page, so I got removed it here also to avoid future confusion.

Sorry. Search fail. This is very similar to <https://redmine.pfsense.org/issues/6287>. This is still showing port aliases on initial page load on 2.3.1_1.

#2 - 06/07/2016 08:54 PM - Phillip Davis

This is a genuine little bonus bug. Thanks for reporting.
