Target version:	2.3.2		
Description			
Is it possible to have a ln -s /var/log/dmesg.boot /var/run/dmesg.boot? The vm-bhyve package expects the file at the standard location.			
Is there a reason why dmesg.boot is under varlog_path instead of varrun_path?

Revision 6ee6c8bb - 07/08/2016 08:18 PM - Doktor Notor

Create /var/run/dmesg.boot symlink for vm-bhyve (Feature #6573)

See <https://redmine.pfsense.org/issues/6573>

History

#1 - 07/05/2016 01:01 PM - Jim Pingle

It was relocated because /var/run is a tiny memory disk used for some very volatile files to save disk writes, and there is more room in /var/log/

A symlink should be OK, but some code would need to create the link at each boot. Should be fairly simple to do.
