

pfSense - Bug #6597

"PPPoE clients" placeholder wrong in firewall rules, floating rules on PPPoE creates broken ruleset

07/10/2016 07:40 PM - Chris Buechler

Status:	Resolved	Start date:	07/10/2016
Priority:	Normal	Due date:

Category:	Rules / NAT	Estimated time:	0.00 hour
Target version:	2.3.2		
Affected Version:	All	Affected Architecture:	

Description

Couple issues with firewall rules and PPPoE server.

- 1) the "PPPoE Clients" network wrongly fills in the server IP.
- 2) If choosing the "PPPoE server" interface in floating rules, it omits the interface from the resulting rule, creating an invalid ruleset.

PR 3032 merged, confirmed to fix both.
