

pfSense - Bug #6708

diag_sockets wrong info

08/13/2016 05:35 PM - Jeremy C. Reed

Status:	Resolved	Start date:	08/13/2016
Priority:	Normal	Due date:	
Assignee:	Jim Pingle	% Done:	100%
Category:	Web Interface	Estimated time:	0.00 hour
Target version:	2.3.2-p1	Affected Version:	
Plus Target Version:		Affected Architecture:	
Release Notes:	Default		

Description

the diag_sockets.php info says sockstat uses capital -L when using the lowercase -l. It does not use -L and it does show the the loopback addresses (:::1 or 127.0.0.0/8).

Also why there don't use the man page details verbatim, so exclude the unnecessary ADDRESS and other UNIX sockets documentation.
