<b>Target version:</b>	2.3.3	<b>Affected Architecture:</b>	
<b>Affected Version:</b>	2.3.x		

#### Description

ISC DHCP Server 4.3.0 introduced a bug which caused hostnames to go missing in pfSense 2.3.x. This was addressed through a workaround in pfSense 2.3.2 (see ticket [#6589](#)). The issue was subsequently [fixed upstream](#). The fix is now available in [ISC DHCP Server 4.3.5](#) which was released today.

The workaround commits referenced in ticket [#6589](#) can now be reverted on any branches that integrate ISC dhcpd 4.3.5.

See [this forum thread](#) for background.

#### History

##### #1 - 11/03/2016 09:26 PM - Jim Thompson

- Assignee set to Renato Botelho
- Target version set to 2.4.0

##### #2 - 11/18/2016 10:47 AM - Renato Botelho

- Status changed from New to Feedback

Done for 2.3.3 and 2.4.0

##### #3 - 01/13/2017 12:39 PM - Jim Pingle

- Status changed from Feedback to Resolved

New version is there, workarounds are gone. Seems fine.

##### #4 - 02/10/2017 10:35 AM - Jim Pingle

- Target version changed from 2.4.0 to 2.3.3
