

pfSense - Bug #6893

Configuration XML is inconsistent with self closing tags

11/04/2016 09:39 AM - Kevin Wojniak

Status:	Resolved	Start date:	11/04/2016
Priority:	Low	Due date:	
Assignee:	Steve Beaver	% Done:	100%
Category:	Backup/restore	Estimated time:	0.00 hour
Target version:	2.3.3	Affected Architecture:	
Affected Version:	2.3.x		

Description

Whenever I make changes I do "Download configuration as XML" and store the file in a git repository, so I always view the diff of what's changed. Very often, tags that are empty don't always generate the same output.

For example, the <shaper> element was:

```
<shaper>
</shaper>
```

but now it's:

```
<shaper />
```

- File *config_diff.png* added

Here's another example. I only deleted some L2TP users, but the XML has changed for these values (screenshot from SourceTree).
