Description

In the "VPN > IPsec > Tunnels > Edit Phase 1" screen, there is a "Key Exchange version" popup, its contents are:
V1
V2

I suggest renaming the contents to:
IKEv1
IKEv2

This would make it clearer quickly scanning the page to find where the IKE setting is.

Contrast with the "Internet Protocol" popup just below. It's contents are:
IPv4
IPv6

not merely:

v4
v6
