

pfSense - Bug #6934

/usr/bin/install missing from new 2.4 installations

11/15/2016 10:13 AM - Jim Pingle

Status:	Resolved	Start date:	11/15/2016
Priority:	Normal	Due date:	
Assignee:	Renato Botelho	% Done:	100%
Category:	Installer	Estimated time:	0.00 hour
Target version:	2.4.0		
Affected Version:	2.4	Affected Architecture:	All

Description

Same as [#6643](#) but it's happening again on 2.4 now.

/usr/bin/install is missing from a fresh install, updating to a new snapshot brings it back as with the previous ticket.

Given the various OS and installer changes I figured it was best to make a new ticket than reopen the old one.

Revision c0ac85e7 - 11/16/2016 03:15 AM - Renato Botelho

There is no ./install to be excluded in 2.4. It fixes #6934

I just did a fresh install with the 11/16/16 build. I was able to restore my configuration and all packages installed normally. Thank you.
