

pfSense - Bug #6952

Generating user certs from imported CA fails silently when no starting serial# is set

11/23/2016 06:59 AM - Harald Linden

Status:	Resolved	Start date:	11/23/2016
Priority:	Normal	Due date:	
Assignee:	Harald Linden	% Done:	100%
Category:	Certificates	Estimated time:	0.00 hour
Target version:	2.4.0		
Affected Version:	2.3.2	Affected Architecture:	All

Description

Steps to reproduce:

- Import external CA
- Do not set "Serial for next certificate"
- Try to create a user certificate

This fails silently. It should fail with an error message. Maybe it would also be a good idea to set "Serial for next certificate" to a default value of "1" if nothing is entered on CA import.
