

pfSense - Bug #7025

wizard.php?xml=setup_wizard.xml - Setup wizard is flagging valid LAN IP addresses as invalid

12/20/2016 01:19 PM - Jim Pingle

Status:	Resolved	Start date:	12/20/2016
Priority:	High	Due date:	
Assignee:	Steve Beaver	% Done:	0%
Category:	Web Interface	Estimated time:	0.00 hour
Target version:	2.4.0		
Affected Version:	2.4	Affected Architecture:	

Description

Go through the setup wizard to the LAN configuration page, enter a valid IP address, click or tab out of the field and a JS alert pops up stating the address is invalid, when it's actually a valid IPv4 address.

- Status changed from New to Confirmed

This appears to be Chrome related. No problem on Safari or Firefox. Probably the Chrome pattern matching bug. Checking now.

#2 - 12/20/2016 01:31 PM - Jim Pingle

It happens to me on Firefox (50.1.0 on Linux) but I was using an SG-1000 when I confirmed it, as that's what the reporting user had used.
