As title says, when one clicks on Open Lightsquid HTTP error 500 appers.			

History

#1 - 01/18/2017 09:17 AM - Jim Pingle

- Project changed from pfSense to pfSense Packages
- Category set to Lightsquid
- Status changed from New to Confirmed
- Assignee set to Jim Pingle

#2 - 01/18/2017 09:23 AM - Jim Pingle

- Assignee changed from Jim Pingle to Renato Botelho

Looks like we're missing the latest change to the Makefile for www/lightsquid from earlier this week, CGI.pm was removed from newer perl versions so now it needs to depend on www/p5-CGI

<https://svnweb.freebsd.org/ports/head/www/lightsquid/Makefile?r1=431686&r2=431685&pathrev=431686>

#3 - 01/18/2017 09:49 AM - Renato Botelho

- Status changed from Confirmed to Feedback
- Target version set to 2.4.0
- % Done changed from 0 to 100

3.0.4_3 should be fixed

#4 - 01/18/2017 09:51 AM - Jim Pingle

- Assignee changed from Renato Botelho to Jim Pingle

I'll grab this back for testing once the new package is available

#5 - 01/18/2017 03:32 PM - Jim Pingle

- Status changed from Feedback to Resolved

Works
