

pfSense - Bug #7138

Pfsense wide dhcpv6 client doesn't recognise ifid statement

01/19/2017 02:47 AM - Bogdan P

Status:	Assigned	Start date:	01/19/2017
Priority:	Normal	Due date:

Category:	DHCP6	Estimated time:	0.00 hour
Target version:	Future	Affected Architecture:	
Affected Version:	All		

Description

Right now a user cannot set a specific ipv6 address on a tracked interface. The interface id is autogenerated based on EUI-64. Trying to manually insert an ifid statement throws out an error (unrecognised statement). Obviously there is no exposed option in gui.
