<b>Target version:</b>	2.3.3	<b>Affected Architecture:</b>	
<b>Affected Version:</b>	All		

#### Description

- 1) Create a new user.
- 2) Add "WebCfg - Help pages" priv for the user.
- 3) Add some other page privs for the user.
- 4) Login as that user

They are taken to the 1st page they have priv for, which is help.php, and that redirects off to the help for index.php (Dashboard help page). The user cannot get to the pfSense webGUI.
