<b>Affected Version:</b>	2.3.4		

#### Description

On the Status / Traffic Totals, if you use Bar (Stacked) type, the vertical axis scale is only high enough for the TX or RX, but not both stacked. The problem appears to be on any time scale.

The Line (Stacked) graph has the correct scale to display both values stacked.

This should be fixed in the newer versions of nvd3. I am attempting to upgrade, but there are some kinks to work out.
