

pfSense - Feature #7405

Ability to add dhcp host reservations from "Diagnostics -> ARP table"

03/17/2017 05:57 AM - ml 35

Status:	New	Start date:	03/17/2017
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	DHCP Server	Estimated time:	0.00 hour
Target version:			
Description			
It can be very useful when you introduce pfsense into a lan where there are lots of static ip addresses.			
This way you can easily convert all hosts from static into dhcp without losing their current ip addresses and at the same time without having to manually add dhcp static mappings in to DHCP Server for each host.			
Additionally it can prove very useful to quickly add their hostnames into DNS Forwarder (if the option "Register DHCP static mappings in DNS forwarder" is enabled)

Hi,

Any chance for this to be implemented?
