Target version:	2.4.0		
Description vpn_l2tp.php recommend confirming that DNS servers l2tp_dns1 and l2tp_dns2 are IP addresses. Check this right in vpn_l2tp.php since vpn_l2tp_configure silently checks it. Also while there complain if l2tp_dns2 is set but l2tp_dns1 is not, since vpn_l2tp_configure won't use it if the first is not set. (I noticed this while working on my book. My list of bugs is at http://reedmedia.net/books/pfsense/bugs.html)
