

pfSense - Bug #7565

openvpn and port 0

05/20/2017 09:25 AM - Jeremy C. Reed

Status:	Resolved	Start date:	05/20/2017
Priority:	Normal	Due date:	
Assignee:	Jim Pingle	% Done:	100%
Category:	OpenVPN	Estimated time:	0.00 hour
Target version:	2.4.0	Affected Architecture:	All
Affected Version:	All		

Description

openvpn_validate_port() has:
if (empty(\$value ...

so when passing zero to it complains
(because empty(0) is FALSE):
"The field 'Local port' must contain a valid port, ranging from 0 to 65535"

While I would want it to check for not 0,
the above says zero is okay and the
vpn_openvpn_server.php addInput form for it allows it.

make fix in both places.

Revision 39fed386 - 05/22/2017 11:35 AM - Jim Pingle

Fix OpenVPN server port validation to disallow "0". 0 is still OK for client port, which is the same meaning as blank/empty. Fixes #7565

History

#1 - 05/22/2017 11:36 AM - Jim Pingle

- Category changed from VPN (Multiple Types) to OpenVPN
- Status changed from New to Assigned
- Assignee set to Jim Pingle
- Target version set to 2.4.0
- Affected Version set to All
- Affected Architecture All added
- Affected Architecture deleted ()

Server shouldn't allow 0, but for clients, 0 is the same as blank/empty so that's OK. Needs to reflect the proper range for server ports.

#2 - 05/22/2017 11:50 AM - Jim Pingle
