<b>Description</b>			
<p>Hi,</p> <p>just tried to get a Intel 553 network card running in pfsense 2.4, but it does not work.</p> <p>Issue <a href="https://redmine.pfsense.org/issues/7763">https://redmine.pfsense.org/issues/7763</a> already states that freebsd 11.1 has old intel drivers.</p> <p>Would it be possible to add support for Intel 553 by updating the intel drivers?</p> <p>kind regards</p>			

#### History

Hi,

could also be easier as this here:

<https://wn.net/Articles/735126/> or in more detail this: <https://reviews.freebsd.org/D11232>

thanks a lot!

Hi, having the same issue. I guess the new driver is needed.

Was fixed in FreeNAS already.

<https://bugs.freenas.org/issues/26292>

**#4 - 08/20/2019 08:39 AM - Jim Pingle**

- Category changed from Operating System to Hardware / Drivers

- Status changed from New to Resolved

FreeBSD appears to have added support for that card a while back. Re-test on a current version (2.4.4-p3 or later), and if it still doesn't work, test on a development snapshot (2.5.0 or later).
