

pfSense - Feature #8278

Add control for source address of RFC2136 updates

01/13/2018 03:26 PM - Chris Linstruth

Status:	Resolved	Start date:	01/12/2018
Priority:	Normal	Due date:	
Assignee:	Jim Pingle	% Done:	100%
Category:	Dynamic DNS	Estimated time:	0.00 hour
Target version:	2.4.3		
Description			
Using the local directive in the nsupdate can cause breakage in certain scenarios where the source address of the update connection needs to be something other than the address of the interface being monitored.			
Maybe a source interface selector or a checkbox to not add the local directive is in order.
