

pfSense - Bug #8301

Dashboard Widgets may no longer need CSRF disabled

01/29/2018 11:20 AM - Jim Pingle

Status:	Resolved	Start date:	01/29/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Dashboard	Estimated time:	0.00 hour
Target version:	2.4.3	Affected Architecture:	All
Affected Version:	2.4.x		

Description

CSRF is deliberately disabled in some widgets such as traffic_graphs.widget.php but it's unclear if that is still necessary.

I removed the \$nocsrft = true; line from traffic_graphs.widget.php and the widget is still functional and settings can still be saved.

We may need to test each widget individually and verify if any still have issues. The original commit disabling CSRF in widgets was 7 years ago and the dashboard has went through significant architecture changes since then.

#3 - 02/15/2018 01:29 PM - Jim Pingle

- Status changed from Feedback to Resolved

Every widget I've tried still works, it's been in snaps for two weeks and no other complaints, I'd say it's resolved.
