

pfSense Packages - Bug #8340

Status_Traffic_Totals Error

02/19/2018 05:43 PM - Matthew Drury

Status:	New	Start date:	02/19/2018
Priority:	Normal	Due date:	
Assignee:	Jared Dillard	% Done:	0%
Category:	Status Traffic Totals	Estimated time:	0.00 hour
Target version:		Affected Architecture:	amd64
Affected Version:	2.4.2_1		

Description

While checking in on my traffic totals using the Status_Traffic_Totals package I've gotten an error that I can't fix. The Data Summary is empty and the Interactive Graph show: Error: {"vnstatversion":"1.15","jsonversion":"1","interfaces":[Error: Database load failed even when using backup (No such file or directory). Aborting.

I've tired uninstalling the package, rebooting, and nothing seems to fix it.

History

#1 - 03/10/2018 01:02 PM - Matthew Drury

An update note:

If I go into the package settings and disable graphing, then re-enable it, the problem appears solved. I have lost all my previous records, though I do not know if that is due to re-installs or a result of the bug problem to begin with.
