Target version:			

Description

See pull request: <https://github.com/pfsense/FreeBSD-ports/pull/501>

Updated package version to 1.2.3

Includes new 'VLAN' flow tracking level

Includes new 'IPFIX' protocol option

Flows will now include a unique ID (or index) to differentiate between multiple instances of softflowd

The indexes will be displayed in an info box at the top of the settings page when softflowd is enabled
