

pfSense - Feature #8361

Add entered name to captive portal status and logs

03/07/2018 09:40 AM - Fredrik Forsell

Status:	Resolved	Start date:	03/07/2018
Priority:	Low	Due date:	
Assignee:	Renato Botelho	% Done:	100%
Category:	Captive Portal	Estimated time:	0.00 hour
Target version:	2.4.4		
Description			
When using the captive portal with "Authentication: None", it would be useful to log the name the person enters in the portal, and not allow an empty name. This makes identifying a session much easier.

I confirm that the fix is working. Name of the user is now recorded in captiveportal status and logs on last snapshot.

Also, if you want to forbid empty names, i suggest to create a custom login page that block empty names using javascript. If you really want to forbid empty names, you could include a patch at the begining of /usr/local/captiveportal/index.php

```
if (empty ($_POST['auth_user']) || $_POST['auth_user']=== 'unauthenticated') {  
    log_error("Submission to captiveportal with empty user name");  
    portal_reply_page(null, "error", gettext("Empty names forbidden"));  
    ob_flush();  
    return;  
}
```

This issue can be marked as resolved.
