

## pfSense - Feature #8371

### Reduce config.xml size by removing picture widget images to file system

03/16/2018 10:51 AM - Steve Beaver

<b>Status:</b>	Resolved	<b>Start date:</b>	03/16/2018
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Steve Beaver	<b>% Done:</b>	0%
<b>Category:</b>	Configuration Upgrade	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	2.4.3		
<b>Description</b>			
Images now saved in /conf Upgrade_config function writes any images out to file system and truncates the config.xml entry			

#### History

##### #1 - 03/16/2018 10:54 AM - Steve Beaver

- Private changed from No to Yes

##### #2 - 03/16/2018 12:53 PM - Jim Pingle

- Private changed from Yes to No

##### #3 - 03/16/2018 12:54 PM - Chris Macmahon

- File Screenshot from 2018-03-16 13-49-21.png added

new VM, setup picture, downloaded a backup. reset to factory defaults, restored backup, no Image in the widget: Screenshot from 2018-03-16 13-49-21.png!!

##### #4 - 03/16/2018 01:36 PM - Jim Pingle

- Status changed from Feedback to Assigned

Upgraded with a picture in the widget and it was broken after the upgrade. No sign of the image in /conf/

Missing picture results in a PHP error:

```
[16-Mar-2018 14:32:10 America/Indiana/Indianapolis] PHP Warning: file_get_contents(/conf/widget_image.picture-0): failed to open stream: No such file or directory in /usr/local/www/widgets/widgets/picture.widget.php on line 32
```

Storing a new picture works as expected.

##### #5 - 03/26/2018 07:47 AM - Steve Beaver

- Status changed from Assigned to Feedback

#6 - 03/26/2018 10:20 AM - Jim Pingle

- Status changed from *Feedback* to *Resolved*

Works OK now, and no PHP errors when the picture is missing.
