

History

#1 - 03/30/2018 07:19 AM - Jim Pingle

- Project changed from *pfSense Packages* to *pfSense*
- Subject changed from *[your_firewall_IP]/status.php & status_output.tgz* to *status.php* - Some package password fields are not redacted
- Category set to *Web Interface*
- Priority changed from *Normal* to *Very Low*
- Target version set to *2.4.4*

I can add them to the redacted field list.

That said, these are from packages and the base system *status.php* can't always keep up with or know about changes from packages.
