pfSense - Bug #8497

route errors ("route has not been found") on current 2.4.4 snapshots

05/04/2018 08:45 AM - Jim Pingle

Status:	Resolved		**Start date:**	05/04/2018
Priority:	High		**Due date:**	
Assignee:	Jim Pingle		**% Done:**	100%
Category:	Routing		**Estimated time:**	0.00 hour
Target version:	2.4.4			
Affected Version:	2.4.4		**Affected Architecture:**	All

Description

During boot, the console logs numerous identical errors:

```
route: route has not been found
```

They happen, at a minimum, when configuring:

- OpenVPN
- Firewall
- Gateway Monitors
- Static Routes

It looks like most of these places call route_add_or_change(), openvpn might be from openvpn_clear_route(). The routes appear correct, but the errors were not output to the console before.

Revision fecb8603 - 05/10/2018 09:14 AM - Jim Pingle

Suppress route command errors and related debug output. Fixes #8497

History

#1 - 05/05/2018 03:57 PM - James Snell

FYI - I do have routing issues along with this error following a reboot (initial reboot from install was ok).

Routes were present to local sources, the default gateway, and ISP DHCP supplied nameservers - but not the rest of the internet.

In the UI (System -> Routing) the IPv6 route was missing (though IPv4 wasn't routing either but was present) resetting that seemed to solve the problem so far.

I'm planning on a reboot around 10am BST and will update if the problem recurs.

#2 - 05/06/2018 11:26 AM - James Snell

Two reboots since 10am, routes ok.
