<b>Description</b>	
<p>By default GUI for OpenVPN server creates line as:</p> <pre>push "route 10.0.0.0 255.255.255.0"</pre>	
<p>Sometimes if you have two servers configured on the same router and you sharing same routes it would be nice to have ability to add metric option. I guess there is only some changes to make in webGUI.</p> <p>Of course I can move routes to custom options</p> <pre>push "route 10.0.0.0 255.255.255.0 192.168.1.0 900"</pre>
