<b>Affected Version:</b>	2.4.3_1	<b>Affected Architecture:</b>	All

#### Description

Webinterface does not save ACL entries or changes to existing ones when WebUI is set to German language. Works fine when switching to English.

How to reproduce:

Switch UI to German, go to [https://&lt;ip&gt;/services\\_unbound\\_acls.php](https://&lt;ip&gt;/services_unbound_acls.php)

Add new entry, save, witch tabs and see nothing setup.

Workaround:

Switch UI to English, to your work, switch back.
